Preface	v
Part I	
Setting up MATLAB and C++ Compiler	1
1 Introduction	3
1.1 Introduction	3
1.2 Projects and Analysis	3
1.3 Computer Software and Book Features	4
1.4 MATLAB C/C++ Types	5
1.5 Differences between C++ and MATLAB C++	5
1.6 Reference Manuals	6
2 Opening a C++ File in Microsoft Visual C++ 6.0	7
2.1 Opening a New C++ File	7
2.2 Adding a Header File into a Project	14
2.3 Writing Code in a Header File	15
2.4 Writing Code in a C++ File	18
2.5 Building and Executing a C++ Project	19
3 Setting Up a Project for a Stand Alone Application	21
3.1 Project Set-up Procedure	21
3.2 Testing the Project Set-up	25
4 Transfer Types	27
4.1 Transfer Type from C++ Type to mxArray	27
4.2 Transfer Type from mxArray to C++ Type	28

4.3	Transfer Type from C++ Type to mxArray	30
4.4	Transfer Type from mxArray to C++ Type	31
4.5	Transfer Type from mxArray to mxArray	33
4.6	Transfer Type from mxArray to mxArray	34

Part II

Calling up MATLAB C/C++ Library Functions 36

5 Matrix Computations 39

5.1	Matrix Addition	39
5.2	Matrix Multiplication	42
5.3	Matrix Determinant and Inverse Matrix	45

6 Linear System Equations 47

6.1	Linear System Equations	47
6.2	Sparse Linear System	51
6.3	Tridiagonal System Equations	54
6.4	Band Diagonal System Equations	59

7 Ordinary Differential Equations 65

7.1	First Order ODE	65
7.2	Second Order ODE	71

8 Integration 81

8.1	Single Integration	81
8.2	Double-Integration	84

9 Curve Fitting and Interpolations 87

9.1	Polynomial Curve Fitting	87
9.2	One-Dimensional Polynomial Interpolation	90
9.3	Two-Dimensional Polynomial Interpolation for Grid Points	92
9.4	Two-Dimensional Polynomial Interpolation for Non-Grid Points	99

10 Roots of Equations 107

10.1	Roots of Polynomials	107
10.2	Roots of Nonlinear-Equation	109

11 Fast Fourier Transform	113
11.1 One-Dimensional Fast Fourier Transform	113
11.2 Two-Dimensional Fast Fourier Transform	117
12 Eigenvalues and Eigenvectors	125
12.1 Eigenvalues and Eigenvectors	125
13 Random Numbers	129
13.1 Uniform Random Numbers	129
13.2 Normal Random Numbers	135
 Part III	
MATLAB Workspace and C++ Functions	142
14 MATLAB Engine	145
14.1 MATLAB Engine with Input/Output as Scalars and Vectors	145
14.2 MATLAB Engine with Input/Output as Matrix	150
15 Generation of a C++ File from a MATLAB M-File	159
15.1 Generation of a DLL-File from a MATLAB M-File	160
15.2 Generation of a C++ Function with Input/Output as Vectors	165
15.3 Generation of a C++ Function with Input/Output as Matrixes	169
15.4 Generation of a C++ Function with Multiple Outputs	170
16 MEX-Files	171
16.1 MEX-File with Input/Output as Scalars	171
16.2 MEX-File with Input/Output as Vectors	174
16.3 MEX-File with Input/Output as Matrixes	177
16.4 MEX-Function Analysis	181
 Appendices	182
A Value Assignment for mxArray	185
B Examples of Transfer Type between C++ and mxArray	191
B.1 C++ File	191
B.2 Header file	192

C	Examples of Transfer Type between C++ and mxArray	201
C.1	C++ File	201
C.2	Header file	202
D	Examples of Transfer Type between mxArray and mxArray	211
D.1	C++ File	211
D.2	Header file	212
E	Handling Function Returns	217
E.1	Function Return as a Vector	217
E.2	Function Return as a Matrix	222
F	Pointer to Function	231
F.1	Case 1: Both Functions A and B are Global Functions	232
F.2	Case 2: Function A is a Global Function and Function B is a Class Member Function	233
F.3	Case 3: Function A is a Class Member Function and Function B is a Global Function	235
F.4	Case 4: Both Functions A and B are Class Member Functions	237
F.5	Pointer to Function in MATLAB C/C++	238
G	Pointer to Array of Functions	245
	Bibliography	249
	Index	251
